Summary

Aspiring Web Developer currently pursuing a Diploma in Computer Science and Technology (CST). Have foundational knowledge of HTML, CSS, and Tailwind CSS, with ongoing learning in JavaScript, React, and Next.js. Interested in building responsive, user-friendly web applications and strengthening problem-solving skills through hands-on projects. Eager to learn modern web technologies and grow as a professional developer.

Technical Skills

Frontend Development: HTML5, CSS3, Tailwind CSS, JavaScript (Basic), React.js (Basic), Next.js (Basic)
Backend Development: Learning MERN Stack fundamentals, including Node.js, Express.js, and MongoDB
Tools & Technologies: Git, GitHub, VS Code, Vite, React-Toastify
Core Competencies: Responsive Web Design, Component-Based Development, UI Styling, JSON Data Handling, Basic State Management, Problem-Solving

Projects & Experience

DevStack — Technology Stack Builder

Technologies: React.js, JavaScript (ES6+), Tailwind CSS, JSON, React-Toastify, Vite
Built a responsive web application that allows users to explore web development technologies and create a personalized technology stack through an interactive interface.

Key Features:

- **Technology Explorer:** Displays technology cards with icons, descriptions, categories, difficulty levels, ratings, and badges using data loaded from a separate JSON file.
- **Interactive Stack Builder:** Enables users to add and remove technologies, prevents duplicate selections, and provides a Remove All option.
- **Responsive Design:** Includes a sticky navigation bar, mobile-friendly menu, responsive technology grid, hero section, and footer.
- **Toast Notifications:** Uses React-Toastify to provide feedback for adding, removing, and duplicate selection attempts.
- **Loading State:** Displays a loading indicator while technology data is being fetched.
- **Consistent UI Theme:** Uses a shared orange-to-pink-to-violet gradient for the brand, hero heading, and primary buttons.

Learning & Development

Building practical web development skills through hands-on projects and continuous learning.

- Learned HTML, CSS, and Tailwind CSS; currently learning JavaScript, React, and Next.js.
- Exploring MERN stack development, backend fundamentals, APIs, authentication, and database integration.
- Practicing responsive design, reusable components, and interactive user interfaces.

Education

Diploma in Computer Science and Technology **Dec 2026 (Expected)**
Borak Polytechnic Institute, Dhaka
